There is No Class of Flowers so much prized as those which are produced from bulbs. Closely following the disappearance of snow and long before ordinary outdoor flowers are in bloom, we may have, in their perfection, the hardy Snowdrop and Crocus; then the fragrant and stately Hyacinths; a little later the varied and brilliant Tulips and the magnificent varieties of Narcissi. These give an air of distinction and refinement to any lawn or garden, affording much pleasure to all who pass by. **We send with every order full directions for both garden and indoor culture.**

When to Plant We would particularly emphasize the fact that **fall and not spring** is the time to plant all kinds of spring-flowering bulbs. The larger part of the bulbs offered are ready to ship the second week in September, but a few sorts not until November.

Outdoor Culture The bulbs should be planted as soon after September as possible, so that the roots will make good growth before the cold weather sets in. They may be set out from then until the ground becomes frozen. They require a moderately rich soil that has been well manured for previous crops, or else apply well-rotted cow or sheep manure, or bone meal. Fresh manure is injurious to bulbs. The soil should be well drained. A small quantity of sand or fine coal ashes at the base of each bulb will be beneficial when the soil is heavy. How far apart and how deep to plant the different bulbs is shown in the accompanying chart.

When the ground freezes hard, the bed should be covered with three or four inches of leaves or dry litter. Too early and heavy covering starts the tops prematurely. In the spring the covering should be carefully removed.

Rubber Plant Sprinkler

A **PLANT SPRINKLER** is as essential to the success of your plants as the soil they grow in. With it you can, without injuring your plants or soaking the earth, quickly sprinkle them. It will render valuable aid in keeping the foliage fresh and healthy and free from insects of all kinds. Throws a spray "just like rain." Its value is so apparent that, once secured, you will not be without it again. The Plant Sprinkler is made of Rubber with flat bottom, which allows it to stand upright when not in use. It has a perforated, detachable top. The quality of the rubber is unexcelled, and all goods are guaranteed. It can be used for sprinkling plants, cut flowers, etc., also for dampening clothes and carpets, and for disinfecting uses.

TO FILL THE SPRINKLER—Squeeze the bulb and insert the neck into a basin or bucket of liquid; release the pressure on the bulb and it will at once fill.

FRENCH ROMAN HYACINTHS

EARLY FLOWERING

A CHARMING class of Hyacinths from the south of France (quite distinct from the Dutch Hyacinths), producing graceful, delicately perfumed spikes of flowers. They force readily in the house. Three bulbs can be put in a four-inch, or six bulbs in a six-inch pan or pot, and as each bulb produces several spikes it makes a beautiful plant for conservatory or house decoration. Their treatment is identical with the Dutch Hyacinth. Roman Hyacinths are among the handsomest and most desirable of all bulbs for early winter flowering in the house or conservatory. They begin to bloom very quickly, and throw up great masses of sweet and lovely flowers almost before other bulbs get started. They are absolutely sure to bloom. Though recommended for house culture, they are quite hardy, and when planted in open ground will make an elegant display of lovely flowers very early in the spring.

DON'T FAIL TO PLANT A QUANTITY OF THEM

The bulbs here offered are the true French and Italian stock, imported by us direct from the growers, and measure from twelve to fifteen centimetres in circumference.

SINGLE WHITE—Elegant, fragrant, waxy-white flowers, of surprising beauty.

SINGLE BLUE—Extremely pretty, and in novel contrast with all other varieties.

SINGLE PINK—Fine flowers of a beautiful blush-pink color.

Price, 7 cents each; 12 for 70 cents, postpaid.

Feathered or Cockade Hyacinths

A real curiosity. First, a frizzled cockade-like spike an inch or two in length appears above the soil, and as it slowly rises on its long stalk it becomes five to six times as long as at first, developing into a long feathery blue plume, and lasting for weeks in that condition. One of those pretty, odd things that everybody likes. Perfectly hardy in the garden and fine for pots. Price, 3 cents each; six for 15 cents; twelve for 25 cents.

A Few Novelties in Single Hyacinths

This list contains such novelties only as are real beauties, and a few varieties, which are not entirely new, but to which we wish to draw your special attention.

Price, 15 cents each; six for 75 cents—postpaid.

Arentine Arendsen

Snow-white. The spike is unusually well filled and has a perfect round shape. The broad, wide open petals are of intense whiteness and make the flower look unusually bright and pretty.

Lady Derby

Bright rose-pink. Is rapidly becoming the leading pink pot-hyacinth owing to its lovely shade of pink, its perfect spike on a strong stem and its splendid forcing qualities.

Perle Brillante

Light blue, tinged lavender. Produces an enormous spike of perfect shape and a big, smooth bulb. One of the best of the latest blue varieties.

Buff Beauty

Buff orange-yellow, long narrow truss on strong stem. A very peculiar color.

General De Wet

Light pink. Splendid for bedding as well as for forcing. The medium sized bells are of a lively light pink color with a lighter center and form a big, loose spike.

IVANHOE

Purplish indigo-blue. A sport of the well-known King of the Blues. The large, glossy, indigo-blue bells have a white throat and form a long, well filled narrow spike, which shows much resemblance to a Delphinium flower.

GRAPE HYACINTHS

Very pretty, producing flowering spikes about six inches high, with little round bells so arranged as to resemble a bunch of grapes. Admirable for permanent beds and edgings and partially shaded situations, where they should be planted in groups of one dozen or more, where they will soon spread and being perfectly hardy will take care of themselves. They are very pretty when grown six in a pot in the house for winter flowering.

BLUE—Price, 3 for 5 cents; 20 cents per dozen.

WHITE—Price, three for 5 cents; 25 cents per dozen.

NAMED DUTCH HYACINTHS

Large, Selected, Perfect Bulbs of Finest Quality

FOR DIRECTIONS SEE "HINTS ON BULB CULTURE" SENT WITH EVERY ORDER.

For winter and early spring flowering nothing surpasses the Hyacinth. It is sure to bloom and give satisfaction in the house during the winter or in the garden in early spring. Its large spikes resemble nothing else in cultivation. Rather than offer a long, confusing list of varieties, we have carefully selected twelve each of Singles and Doubles, embracing all the shades of this beautiful flower, each one being the largest, strongest and best of its color.

TWELVE BEST NAMED SINGLE HYACINTHS

We consider the Single Hyacinths more useful and valuable than the double varieties. They are better for forcing, more vigorous in growth, and produce stronger spikes of bloom, which are generally of better substance.

Price, 10 cents each; any six for 50 cents; or the Full Set of Twelve for \$1.00, mail or express prepaid.

ALBERTINA—Pure white, very large, compact spike, fine for early forcing.

ENCHANTRESS—Most delicate porcelain-blue. One of the most beautiful light-blue Hyacinths. The splendid, well finished truss has a strong stem and makes it excellent for growing in pots. The blue color grows lighter towards the center of the bells.

GERTRUDE—Dark pink. The most popular pot and bedding Hyacinth, owing to its color and compact growth. Grown in larger quantities than any other kind.

GIGANTEA—Large, tall spike; large and very shapely, with drooping bells. Flowers shell-pink inside and deep pink outside, touched with violet. A superb sort.

GRANDE BLANCHE—Blush-white. Called also the white Regulus, being a sport of this old variety. Splendid bedder and early forcer.

GRAND MAITRE—Deep lavender-blue, shaded darker blue. The leading and most popular blue. The bright blue bells form an elegant, somewhat loose spike of immense size and perfect shape.

INNOCENCE—This superb Hyacinth is grand. Immense spike of large pure ivory bells, waxy in appearance, vying with the snow in purity; fragrance is delicate, yet penetrating.

KING OF THE BLUES—Rich dark blue, the finest of the deep blues; extra large, well furnished, broad spikes with large bells; erect and fine for pots.

KING OF THE BELGIANS—Bright scarlet. The most popular of the scarlets. Its upright well filled spike make it a good pot Hyacinth and as clear bright colors are mostly used for bedding, it is one of the most popular bedders. Immense stock.

LORD BALFOUR—Lilac-rose tinged dark violet; very early, enormous truss; the best in its color.

THE VICTORY—Bright, glistening red outdoors; under glass a fine, dark pink; long, well-filled spike. Brilliant bedding sort, strong stem and lasting color.

YELLOW HAMMER—Golden-yellow. The most popular of the yellows and a splendid forcer. The medium-sized bells form a very compact, ball-shaped truss, which makes one think of a hammer, hence its name.

TWELVE BEST NAMED DOUBLE HYACINTHS

Price, 10 cents each; six for 50 cents; Full Set of Twelve for \$1.00, mail or express prepaid.

CHESTNUT FLOWER—Extra large truss; bright rose, the flower resembles much that of the horse-chestnut, hence its name.

DELICATA—Clear porcelain-blue; extra large bells.

GRAND CONQUEROR—Clear bright carmine, extra large and handsome in every way. One of the best and most beautiful of all.

ISABELLA—Fine blush-white; grand spike and large bulb.

LA GRANDESSE—A pure white of fine qualities. The spikes are very long, erect and stand well above the foliage. It will always be a favorite. Best double white.

PRESIDENT ROOSEVELT—Tall stems and compact truss; beautifully shaped florets of lively pink.

ROYAL BOUQUET—Pure white, yellow center; very double.

REGINA VICTORIA—Pink, fine early flower. Beautiful.

SOVEREIGN—Golden-yellow; large, perfect bells.

SUNFLOWER—Pure rich, golden-yellow, very double and fine; one of the best double yellows.

THE VIRGIN—Beautiful cream-white, rose center.

VAN SPEYK—Lavender tinted with azure blue; fine compact spike of double bells.

Early Flowering Named Tulips

TULIPS make one of the best, brightest and most attractive and satisfactory flowers for the table that can be used. They will also last as long or longer than any cut flowers which are used for decorations. A bed of assorted Tulips used for this purpose will furnish a continuous feast for weeks during the early spring, when there are practically no other outdoor flowers in bloom. The culture of Tulips is the same as that of Hyacinths, except that the bulbs should be planted about three inches deep and four to six inches apart. Tulips are perfectly hardy, so only a slight protection is required from extreme cold and sharp winds.

NOTE—The varieties marked with a * are equally good for pot culture and for bedding. The letters D, M or T indicate the comparative height when grown outdoors, whether Dwarf, Medium or Tall. Each bulb is wrapped and labeled true to name.

We offer Superfine Early Flowering Bedding Tulips in colors Red, White, Pink or Yellow. Price, \$2.25 per 100; mixed colors, \$2.00 per 100, postpaid; 50 at 100 rate.

Bed of Fifty Large FLOWERING TULIPS FOR \$1.25

We have made this same offer for several seasons, and it is becoming more popular each year.

ALL SEASONS' MIXTURE

THIS collection will contain a splendid mixture of Single and Double Early, Single and Double Late, Parrot and Darwin Tulips, and will include many of the above named varieties. The great advantage gained by ordering this collection is that it will produce flowers during a much longer period than any other collection. For a period of from fifteen to twenty-five days the bed in which you plant them will be ablaze, and will present all the colors known among Tulips. We can most heartily recommend this collection to our patrons. It will make a magnificent circular bed three and one-half feet in diameter.

PRICE, FIFTY BULBS FOR ONLY \$1.25.

LATE OR MAY-FLOWERING COTTAGE GARDEN TULIPS

THIS beautiful class is now very popular. They are quite distinct from the early-flowering sorts offered on the preceding pages, coming into bloom two to three weeks later than the early flowering types, and extending the Tulip season over a period of four weeks or more. On account of their extreme hardiness, they are specially adapted for the permanent hardy flower border, where they should be liberally planted in clumps or masses. They may also be naturalized in grass, wild gardens, etc. For bedding they are superb, while as cut flowers, having long stems with flowers of great substance, they stand in perfect condition for a long time. In planting, the bulbs should be set a little deeper than early Tulips, a covering of four inches being about right.

Leading Varieties of Garden Tulips

Price, 4c each; 40c per dozen.

FAIRY QUEEN—Rosy-heliotrope with a broad yellow margin; color is absolutely unique. The flowers reach an enormous size, last very long and have long, graceful stems, making it ideal for bouquets.

GESNERIANA SPATULATA—The grandest Tulip in existence. Tall growing and late blooming, with large, long leaves and tall, erect flower stalks, which support great waxen blooms, larger than teacups, of the most vivid, glossy coral-red, each flower showing a deep blue-black blotch at the base that further enhances its beauty; in bloom a long time.

Our Collection Embraces all the Best Types of the Garden Tulip and Your Order Should Include at Least a Few of These Most Satisfactory Bulbs.

Giant Darwin Tulips.

Giant Darwin Tulips

THE new Giant Darwin Tulips are late May-flowering Garden Tulips, and produce very large bowl-formed flowers of symmetrical shape and lasting wax-like substance, on tall, strong stems, two to three feet high, and are exceedingly beautiful and effective grown in groups, in the shrubby or herbaceous border, or in gardens with a background of greenery. They by far surpass in color and brilliancy anything before known in Tulips. They include almost every conceivable color and shade.

Price, 4c each; three for 10c; 35c per dozen.

BARONNE DE LA TONNAYE—A long and beautiful flower; clear carmine-rose at the midrib, toning off to soft pink at the edges; base white, tinged blue; height twenty-four inches. The leading bedder of the pink Darwins, keeping its brightness and standing upright to the last, no matter what kind of weather it is in.

CLARA BUTT—A large flower of remarkable beauty; coloring an exquisite shade of soft salmon-pink shaded rose; height twenty inches.

KATE GREENAWAY—One of the largest and latest of all the Darwins. A grand big flower of white suffused with lilac; tall grower.

NAUTICAS—Purplish-rose, with dark violet base shaded bronze; very large flower on a tall stem.

QUIDA—Bright crimson-scarlet. A variety of unsurpassed qualities for bedding, but too little known. The unusually tall and strong stem holds the big flower up perfectly. The flower lasts very long and the bright crimson color never fades. One of the brightest and best of the Darwins.

ELEGANS—Brilliant crimson with yellow center; long flower with reflexing petals. An attractive Tulip for bedding, and very good for late forcing.

PICOTEE (Maiden's Blush)—This is one of the finest of late Tulips, pure white, with brilliant rose edging, large flower on stout stem. A dainty flower of exquisite beauty.

PARISIAN WHITE—Large white reflexed petals margined rosy-red, a very attractive flower. One of the finest.

PARISIAN YELLOW—Bright yellow, with darker yellow center; large, pointed flower. Very attractive among shrubbery.

SALMON QUEEN—Beautiful salmon, very tall and fine. A large, long-stemmed flower of finest substance; fine bedder and unequalled for cutting.

PRIDE OF HAARLEM—Brilliant rosy-carmine with blue base. This is one of the oldest varieties, but hard to beat yet in color and size. Most flowers have more than six petals, which makes them look semi-double sometimes. It will remain a standard variety as long as Darwins are used.

THE SULTAN—Rich, glossy black maroon; one of the best dark varieties.

WHITE QUEEN—White. Can be called the only white Darwin. It opens rosy-white, but passes off pure white. One of the most popular varieties, which can be easily forced.

Mixed Darwin Tulips

Our supply of these comes from a specialist who grows over fifty sorts, most of which are represented in this mixture. Price, 3 cents each; 30 cents per dozen; \$2.50 per hundred.

Parrot or Dragon Tulips

The most beautiful and interesting class of late flowering Tulips, which should be in every garden. The flowers are very large and perfect in shape, the petals are corrugated and toothed, while the color is the most striking combination of crimson and golden-yellow, streaked and edged with green, resembling the plumage of a parrot, whence these Tulips derive their name. A bed of these makes a gorgeous display, paying a hundredfold for any trouble that may be bestowed upon them. Fine large bulbs, mixed colors, price, 3 cents each; 30 cents per dozen; \$2.00 per hundred.

BREEDER TULIPS

Breeders, formerly listed among the Cottage Tulips, form a distinct class by themselves, being "unbroken" forms of the old-time "florist" Tulips. They have been more or less neglected and grown only in some obscure corners, until a taste for so-called "art colors" awakened and with the revival of that taste for bronze, brown and buff tones, the attention was drawn to these old-fashioned Tulips and in no time they have become the most popular of all late Tulips.

And they deserve it. Not only for their peculiar and odd colors, but also for their great lasting qualities, which make them unusually suited for garden decoration and for the size of their flowers and stems, which many times beat the largest Darwins. They are a most interesting class of Tulips and they are fast taking an important part in the bulb trade.

Price, 4c each; three for 10c; 35c per dozen.

NARCISSUS, DAFFODILS AND JONQUILS

THE FLOWER OF THE POETS

THERE are no hardy bulbous plants which have more points of merit than the Narcissus or Daffodils. Perfectly hardy, growing and doing well in almost any and every position, sun or shade, moist or dry. They turn our gardens, lawns and woodland walks into gorgeous masses of gold and silver, with a fragrance that is enchanting. They are all of the easiest culture, perfectly hardy, and can be grown in any light garden soil. When grown as pot plants in the house they can be brought into bloom at Christmas, and by planting at different times, will bloom continually from December till April. Excepting the Polyanthus varieties, offered on next page, they are perfectly hardy, even in the Northern states; growing and doing well in almost any and every position, in sun or shade, moist or dry. They will succeed best, however, in a thoroughly drained, tolerably rich soil. If the position is one partially shaded from the hot sunshine in the spring, the flowers will retain their beauty for a much longer period than if more exposed.

Large Trumpet Narcissus

This type is the showiest of the genus, and also the most useful, growing easily either indoors or in the open ground.

NOTE—In describing Narcissus, it is usual to give the color of the trumpet or crown and the color of the perianth or petals surrounding the trumpet.

Two-Colored Varieties, White and Yellow

POLYANTHUS NARCISSUS

OR BUNCH-FLOWERED DAFFODILS

The Polyanthus varieties of Narcissus are not only beautiful, but deliciously sweet-scented, and of the easiest culture, suitable for window garden, conservatory or garden, very free flowering and continuing long in bloom. Their tall spikes of bloom bear from six to one dozen flowers each. The pure white petals and gold cups of some varieties, the yellow with deep orange cups of others and the self white and yellows render them great favorites. They are not quite so hardy as the other types of Narcissus, and therefore should be carefully protected in cold climates when grown in the garden. South of the freezing belt they are splendid for gardens.

PAPER=WHITE GRANDIFLORA

This is the earliest of all, blooming by Christmas, and with its long-stemmed clusters of starry-white flowers—much larger than the old variety—is indeed most beautiful; very fragrant also. This variety is perhaps more largely forced for cut flowers than any other, millions of them being used for the large flower markets of the world. Price, 4 cents each; six for 20 cents.

GRAND PRIMO

A splendid sort, good grower, with tall stems and fine clusters of extra large flowers. Petals pearl-white, yellow cup. The whole flower is very sweet. Price, 5 cents each; six for 25 cents.

GLORIOSA

This is an extra fine variety, has immense trusses of pure white flowers with primrose colored cups. Easily forced. Price, 5 cents each; six for 25 cents.

NEWTON

Large yellow flowers with orange cup. This is very distinct and a free bloomer. Fine for pots. Price, 5 cents each; six for 25 cents.

WHITE PEARL

The whole flower is pure white, large and exquisitely fragrant. A most beautiful variety and a free bloomer with large trusses. Price, 5 cents each; six for 25 cents.

We will send one each of the above five varieties for 20 cents.

Narcissus Jonquilla, or Jonquils

Much prized for their charming golden and deliciously sweet-scented flowers; perfectly hardy, and flowering very early in the spring. Admirably adapted for winter forcing.

SINGLE JONQUIL—The well-known favorite, delicately scented and beautiful for forcing. Rich yellow, very fragrant. Price, five for 10 cents; 20 cents per dozen.

DOUBLE JONQUIL—Heads of small but very double deep golden-yellow flowers, powerfully scented and good for forcing. Price, 3 cents each; 30 cents per dozen.

CAMPERNELLE REGULOSIS—Large, six-lobed yellow flowers, four to six on a stem; fine for forcing, and the one generally preferred by florists. Price, three for 10 cents; 25 cents per dozen.

Chinese Sacred Lily

Oriental Lily or "Joss Flower"—The most satisfactory of all winter-blooming bulbs. No home should be without one. Nothing is easier cared for or gives as great abundance of deliciously-scented bloom. Fill a bowl or similar vessel with pebbles in which place the bulb, setting it about one-half its depth, so that it will be held firmly, then fill with water to the top of the pebbles, and place in a warm, sunny window. The bulb will at once commence rapid growth and bloom in four or five weeks. The bulbs are so large and have so much vitality they can be kept perfectly dry all winter, and be planted at any time when the flowers are desired. Price, extra size, 15 cents each; two for 25 cents.

NOTE—Bulbs offered are large, solid and well matured. Can be relied upon to be true Chinese, superior to those grown elsewhere.

Grand Soliel d'Or

A charming rich yellow flower with deep reddish cup. Thousands of this variety are grown in Scilly Isles for sale in the London market. Flowers are almost identical with the Chinese Sacred Lily except in color, and may be grown in water like the Chinese variety. Price, 6 cents each; six for 30c.

ALL OUR BULBS ARE PROCURED FROM THE MOST RELIABLE GROWERS IN EUROPE, AND OUR ORDERS ARE GIVEN FOR BEST QUALITY ONLY. WE HANDLE NO INFERIOR, CHEAP STOCK.

CROCUS

First Gay Flowers of Spring

Large Flowering Varieties

Beautiful for Growing in Pots, Among the EARLIEST to Bloom on the Lawn in the Spring

Among all the pretty flowers of spring, none is greeted with a heartier welcome than the Crocus. Their flowers are lovely in form, and of the brightest colors—pure white, golden-yellow, purple, pink and variegated. They are entirely hardy and like a rich, dry soil and sunny location. They are suitable for planting in beds and borders, also for edging in ribbon lines of any desired color, for planting in the grass in lawn or yard. Crocus are also very highly valued for house culture. They bloom very quickly and are so cheap that all can afford to have them. Ours are the improved strains, noted for large flowers and brightest colors. Plant in October or November.

Directions for Planting

With a trowel or spade make a slanting opening about two inches deep, put in the bulbs, then with the foot press back the sod. This is an easy way to plant flowers that will be a sheet of bloom almost before the grass is green. They will care for themselves, blooming early amid the grass, and dying down to the bulb in ample time to be entirely out of the way of the lawn mower.

Turkish or Turban Ranunculus

For beauty and grace of form and brightness of colors the Ranunculus is unsurpassed. These attractive qualities have made it a prime favorite. The Ranunculus require careful culture, and are worthy of it. The plants should not be exposed to a hot, dry air, nor to a blazing sun. The soil should be rich and not too dry, and yet well drained. Price, five for 10 cents; 20 cents per dozen.

SCILLAS or SQUILLS

This is one of the prettiest of early spring blooming bulbs of dwarf habit with sprays of exquisite rich flowers of blue and white. They prefer a light, rich soil. Plant in October or November in open ground or in pots.

Scilla Campanulata

(Spanish Blue-Bell or Wood Hyacinth)

The flower stem grows to a height of from ten to twelve inches. Nearly half of this is covered with bell-shaped flowers of the same shape as those of ordinary Dutch Hyacinths. There are from ten to fifteen bells on each stem. Perfectly hardy.

ROSY QUEEN—Beautiful shade of clear shell-pink.

SKY BLUE—Blue as the sky.

ALBA MAXIMA—Pure snow-white.

PRICE, 3 CENTS EACH; 30 CENTS PER DOZEN.

Scilla Sibirica

The Siberian Scilla, or Squill, has flowers of a lovely ultra-marine blue color, borne in graceful spikes. In the house it blooms early, like the Roman Hyacinths, and forms a beautiful contrast with them. In the open ground they are quite hardy, and especially fine planted in small beds or with Snowdrops, and, like them, frequently blooming before the snow has gone. Price, 2 for 5 cents; 25 cents per dozen.

Scilla Alba

This has exactly the same flower as Scilla Sibirica, excepting that it is pure white. Price, two for 5 cents; 25 cents per dozen.

OXALIS

An unrivaled winter flowering pot plant of the easiest culture, succeeding with everybody.

Winter blooming Oxalis are always sure to please. Plant five or six bulbs in a six-inch pot. They commence growth immediately after planting, and need not be set away to form roots like most other bulbs.

GRAND DUCHESS OXALIS

THERE is no doubt about its being one of the most beautiful and taking winter flowers it is possible to have. We have three colors to offer, bright pink, lavender and pure white.

NO EXTRAS ALLOWED ON BULBS SENT BY MAIL.

Chionodoxa Luciliae.

CHIONODOXA LUCILIAE (Glory of The Snow)

These bulbs are very popular, and deservedly so, for their lovely blue and white flowers, produced in long sprays, are seen in the garden among the earliest spring flowers—sometimes even before the snow has disappeared. The bulbs are perfectly hardy and make a fine display when planted in masses outdoors. For window culture they are fully as charming as are Freesias. They bloom very early, commonly by Christmas. Selected bulbs. Price, 3 cents each; 25 cents per dozen.

IXIAS

The graceful flower spikes of the Ixias remind one of Gladiolus, but the flowers are very distinct, being round and well opened. Their brilliant colors and vividly contrasting markings have made them quite popular. For pot culture, plant six in a five-inch pot, and treat as Hyacinths. For outdoor culture they should be planted in a somewhat sheltered situation and protected with leaves or straw.

MIXED SORTS—Many varieties of rich shades and colors. Price, three for 5 cents; 15 cents per dozen.

Freesia, Purity.

Winter-Blooming Freesias

WHITE FREESIA (Purity)—A grand Freesia. Flowers which are snowy-white, of large size, are borne in great profusion on long stems, which grow upright and stiff; are excellent for cut-flower purposes. Price, 4 cents each; six for 20 cents; 35 cents per dozen.

FREESIA REFRACTA ALBA—The flowers are two inches long and about the same in width, and borne in clusters of six to ten. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicate. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window and watered more as growth progresses. When out of flower, store in some place and repot at proper season in fresh soil for another year's growth. Six fine selected bulbs for 15 cents; twelve for 25 cents.

IRIS

Flowering Flag— Fleur-De-Lis

Hardy spring and summer-blooming plants, bearing large, rich and various colored flowers. The tubers or bulbous rooted kinds do not require a rich soil, but a sandy loam will suit them well. The English and Spanish varieties should be planted out in clumps where they may be seen to advantage. The crown of the bulb must not be more than three inches below the surface.

Iris—Flowering Flag.

English Iris

Our collection embraces a full range of color, from a very deep purple to a very pure white. Mixed. Price, two for 5 cents; 25 cents per dozen.

Spanish Iris

This variety is well adapted for pot culture, blooming in the winter earlier than the above, but smaller; beautiful shades of violet, yellow, blue and white. Mixed varieties, three for 5 cents; 15 cents per dozen.

ANEMONES

Highly ornamental winter, spring and summer flowering plants, having both single and double flowers, the colors of which are wonderfully beautiful, running through shades of blue, scarlet, rose, white, lavender, etc. For cutting they are grand. They are splendid for pot culture, flowering in the house or conservatory. Four roots to a five-inch pot, kept cool and secluded until growth appears, will produce handsome decorative specimens for winter use. They are not quite hardy; planted from October to November, they will bloom in early spring, but need covering with litter during winter for protection.

ANEMONE, Single—Mixed; brightest colors. Price, two for 5 cents; 20 cents per dozen.

ANEMONE, Double—Mixed; best assortment of colors. Price, 3 cents each; 25 cents per dozen.

TRITELEJA LAXA

A most valuable addition to winter flowering bulbs for house culture. Several bulbs can be planted in a four or five-inch pot; each will send up numerous flower stalks, producing exquisite, star-shaped blossoms; beautiful dark blue. The flowers follow each other successively, and a pot or basket of these bulbs presents a lovely blooming appearance all winter. This variety is also entirely hardy; can be planted in open ground, blooming in spring. Fine bulbs, two for 5 cents; 25c per dozen.

SEMI-DOUBLE ANEMONES FROM POTS

WHIRLWIND—Strong growth and healthy foliage and free bloomer. Several rows of large white petals; very durable. One of the finest hardy plants for cemetery planting, and excellent for cut flowers. Price, 10 cents each; three for 25 cents.

QUEEN CHARLOTTE—Large semi-double, delicate pink flowers two to three inches in diameter; perfectly hardy. It blooms in September. Price, 10 cents each; three for 25 cents.

Allium.

ORDER EARLY AND PLANT EARLY—Our Bulbs are usually all sold by December 15th. To bloom well in spring, Hyacinths, Tulips, Narcissus, etc., should be planted in October and November.

IF BULBS GO BY EXPRESS, NOT PREPAID, YOU MAY SELECT 20 CENTS EXTRA FOR EACH \$1.00.

ALLIUM VIOLET—The flower stems grow about two feet high. The flower is a round ball about two inches in diameter, composed of numerous small flowers. These have a pure violet shade. Price, 3 cents each; twelve for 25c.

SPARAXIS

Resembles Ixias, but flowers are more drooping, opening flatly. Their combination of beautiful and unusual colors is fascinating. The individual flowers are very large, and the brilliant colors are striped and splashed in every imaginable manner. Fine mixed, all colors, three for 5 cents; 15 cents per dozen.

GIANT SNOWDROPS

The Charming Snowdrop is One of the First Flowers to Herald the Approach of Spring

Beautiful dwarf white flowers, pushing up through the snow in the spring, a habit from which arose this name.

They are lovely little blossoms, and should be found in every garden. Indoors they are equally pretty and easily brought into bloom. Being dwarf, they are usually planted along walks or the margins of beds. The Giant Snowdrops we offer are much superior to the common varieties, producing large flowers.

DOUBLE SNOWDROP—(*Galanthus Nivalis* fl. pl.) Flowers perfectly double, pure white. Price, two for 5 cents; 25 cents per dozen.

GIANT SINGLE SNOWDROP—(*Galanthus Elwesii*.) The largest and most beautiful, flowers snow-white, with emerald-green tube. Price, two for 5 cents; 20 cents per dozen.

OUR "GIANT" COLLECTION OF LARGE TWO-YEAR-OLD EVER-BLOOMING ROSES FOR IMMEDIATE EFFECT

THESE large Roses have become so popular among our customers that we devote a great deal of room to them, growing them in constantly increasing number. These bushes are two years old, strong and healthy. They make, of course, more of an appearance from the first than does the smaller stock, having practically a year the advantage in all respects—an advantage for which we find many persons willing to incur the additional expense.

The selection must be left to us, and we will send only strictly high-grade Roses. All will be different and all correctly labeled.

IMPERIAL ROSE COLLECTION

16 Ever-Blooming Tea Roses for \$1.00

FINE PLANTS FROM TWO AND A HALF INCH
POTS (POSTAGE PREPAID).

THEY are suitable for flowering in pots in the house during winter, and then in spring plant out in the garden, where they will continue to bloom all summer. If you do not desire them for house flowering, they can (at least in southern latitudes) be planted out in the flower border and covered over lightly with straw, evergreen boughs or any light material, to be removed in early spring. This will give you flowers much earlier than if you waited until spring to plant. This collection is strictly of our own selection, and we guarantee them to be well-rooted, to reach you in good condition, and to be a fine assortment of colors, all correctly labeled. Many of our very best varieties will be included in the collection.

ROSES THAT GROW AND BLOOM ROSES

SUPERB COLLECTION OF EVER-BLOOMING HYBRID TEA ROSES

OWING to limited space in fall catalogue, we cannot enumerate and describe as many varieties of Roses as we do in spring. We can, however, furnish all Roses mentioned in our spring catalogue. The demand for Roses during the autumn months is largely confined to house culture during the winter. In the spring they may be transplanted in the open ground, where they will continue to bloom throughout the summer. Fall planting of Roses in open ground is recommended only for the Southern and Pacific Coast States, where the fall and winter is the most favorable time for all kinds of outdoor planting. The kinds here offered are especially recommended for these localities.

PINK MAMAN COCHET "The Queen of all Garden Roses"

Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of, outside of its counterpart, White and Yellow Maman Cochet. The buds are beautiful, large, full and firm, and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes, and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to silvery-rose.

RED MAMAN COCHET

A fine garden variety of even shade of deep rose or red, round and full, the form of a good Hybrid Perpetual. A very free grower, in fact it is one of the strongest growing Roses we have. It flowers as continuously and freely as a China Rose, and is especially fine in autumn. This Rose is bound to take rank with the best Roses grown.

WHITE COCHET

A grand Rose. Identical with its parent, Maman Cochet, the queen of all pink garden Roses, except in color of flower, which is snowy-white, sometimes faintly tinged with the faintest suggestion of pale blush. It has the same freedom of bloom, magnificent form of buds and flowers, which are marvelously beautiful in their perfection. The flowers are large and very double, with petals of unusually heavy texture, making it of more than ordinary value in open ground.

YELLOW MAMAN COCHET

The unusual hardness of this Rose—a pure Tea—makes it especially adapted for bedding. It is a fitting companion to those other grand summer Roses—the White and Pink Cochets—offering a sturdy, clean growth with stiff stems and luxuriant bloom. Flowers large, perfectly double and shapely, of a rich sulphur-yellow.

FERNS

Most Beautiful of all decorative Plants

FOR THE HOUSE AND CONSERVATORY

No plants are easier to grow or more ornamental for house or conservatory culture than these grand new Ferns. They require very little care or attention, are not troubled with insects or diseases, and produce a finer effect than any other plants you can get for many times their cost. The varieties listed herewith include the newest and most beautiful sorts to date. The ordinary temperature of the living room suits them nicely, and their new growths will soon surprise you with their graceful beauty.

Any of the following Ferns in nice young plants, 15 cents each, any four for 50 cents. Strong four-inch pot plants, 40 cents each, any three \$1.00. Large specimen plants, 75 cents each.

Ostrich Plume Fern (*Nephrolepis Whitmanii*)—An improvement on the *Nephrolepis Elegantissima*, with still more gracefully divided pinnae, giving the whole plant an airy, lace-like appearance; makes beautiful symmetrical plants even in small sizes, and large specimen plants are beautiful beyond description.

Boston or Fountain Fern.

The Popular Boston Sword Fern (*Nephrolepis exaltata Bostoniensis*)—In the vicinity of Boston no other plant is used so extensively as this graceful *Nephrolepis*, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern.

The "Roosevelt Fern" (*Nephrolepis Roosevelti*)—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended.

"Teddy Junior" This magnificent Fern is a sport from the now famous Roosevelt Fern, and while its habit of growth is to produce a shorter frond, it retains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant. The fronds have an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy" will produce about four times more fronds than any other Fern. It is such a compact, vigorous grower that it will thrive under most adverse conditions, making an exceptionally rapid growth and producing a plant of rare beauty and perfection in the dwelling house without special care or attention. This Fern makes the finest pedestal plant ever produced; indispensable for decorating.

Nephrolepis Elegantissima Compacta.

Parlor Fern (*Nephrolepis Elegantissima Compacta*)—A dwarf form of *Nephrolepis Elegantissima*, making dense, bushy, compact masses of foliage. One of the most valuable Ferns.

Philadelphia Lace Fern (*Nephrolepis Elegantissima*)—The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description—must be seen to be appreciated.

The Newport Fern (*Nephrolepis Scotti*)—This Fern is all the rage at fashionable Newport. Identical with the Boston Fern, except it is smaller in all of its parts, and more compact, and will make more fronds in a given length of time. The fronds are lighter green than any of the *Nephrolepis*. The plants are never straggly, always making a shapely plant.

Crested Fern (*Nephrolepis Scholzei*, The Plumed Scott Fern)—It is a sport from Scotti, possessing the merits of that most popular variety, but with the pinnae subdivided, giving it an airy feathery appearance. The fronds, like in Scotti, stand erect, with a graceful arch forming a plant of ideal shape, and they never break down. The smallest plants perfectly express the type, and in every size are models of beauty for table decoration.

We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, it is very graceful and is becoming very popular. Asparagus Plumosus Nanus

It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes which increase greatly in number during succeeding years. We recommend covering the roots with manure, leaves or other suitable material as winter approaches.
